Community

[Global Plants Initiative](#) [Resources](#) [Meetings](#)

The Global Plants Initiative, funded by the Andrew W. Mellon Foundation, is an international undertaking by leading herbaria to digitize and make available plant type specimens and other holdings used by botanists and others working in plant science every day. Partners include more than 260 institutions in 70 countries. JSTOR facilitates this initiative by providing production, platform, technical, and promotional support to the participating Global Plants Initiative partners.

DiversityTaxonNames

www.diversityworkbench.net

- Verwaltung der taxonomischen Namen in DiversityTaxonNames mit LIAS Names als Backbone

The screenshot displays the DiversityTaxonNames database interface for the taxon *Aspicilia grisea* Arnold. The interface includes a menu bar (Connection, Query, Lists, References, Data, Help) and a toolbar with various icons. The main content area is divided into several sections:

- Taxon:** *Aspicilia grisea* Arnold, ID: 1001585, Vers.: 3.
- Taxonomic name:** Genus/supragen. *Aspicilia*, Species epithet *grisea*, Aut.: Arnold, Bas. auth., Comb. auth., Publ. auth., Sanct.
- Nomenclature:** Code, Status, Creation type, Comment.
- Taxonomic reference / Protologue:** Ber. Bayer. Bot. Ges., Volume 1, Issue, Pages 62, Detai Anha, D. M. Y. of P. 1891, Suppl., Use ref., on P., Protol.
- Hierarchy:** Sup.tax.: *Aspicilia* A. Massal., Ref., Det., Ascomycota Caval.-Sm., Pezizomycotina O. E. Erikss. & Winka, Lecanoromycetes, Ostropomycetidae V. Reeb, Lutzoni & Cl. Rou.
- Typification:** Reference, Typification: holotype (M-0064056), topotyp, Details, Substrate, Locality, Sp. notes: M-0064056, M-0064057, M-00, Notes.
- Synonymy:** Accepted name, Based on: *Aspicilia grisea* Arnold, Ignore, Concept suffix.

Synonymie

The screenshot displays the DiversityWorkbench v. 3.0.3.8 interface, which is used for managing taxonomic and specimen data. It is divided into several main sections:

- Left Panel (DiversityTaxonNames, Database):** Shows a list of query results for 'Ocellularia alba (Fée) Müll. Arg.', including synonyms like 'Ocellularia alba var. caesiascens' and 'Thelotrema album Nyl.'. It includes filters for 'order by' (Taxonomic Name indicated) and 'Query conditions' (Project: LIASnames).
- Top Panel (DiversityCollection v. 3.0.3.8):** Displays the current specimen record for 'M-0034689' of 'Thelotrema album Nyl. Isotype'. It shows specimen details like 'Specimen ID: 454378', 'Event: 320984', and 'Version: 5 2'. It also features a list of 'Images of the specimen' and a 'Query results' list.
- Center Panel:** Contains a tree view of taxonomic relationships. The current specimen is linked to 'Ocellularia alba (Nyl.) Zahlbr.', which is further linked to 'Thelotrema album Nyl. - Isotype' (respons.: Hale) and 'Glaziou, A.F.M. (No.: 1974)'. The location is noted as 'Brasilien, Pr. Rio de Janeiro'.
- Right Panel:** Provides detailed taxonomic information for 'Ocellularia alba (Nyl.) Zahlbr.' (No. 554610). It includes fields for 'Tax. group: lichen', 'Family: Graphidaceae', 'Order: Ostropales', and 'Type notes: Hale, M.E.'. It also shows 'Identification / name changes' with 'Tax. name: Thelotrema album Nyl.' and 'Vern. tem.: Hale, M.E.'. A note at the bottom right states 'High resolution image IQ180'.
