

generated January 2023

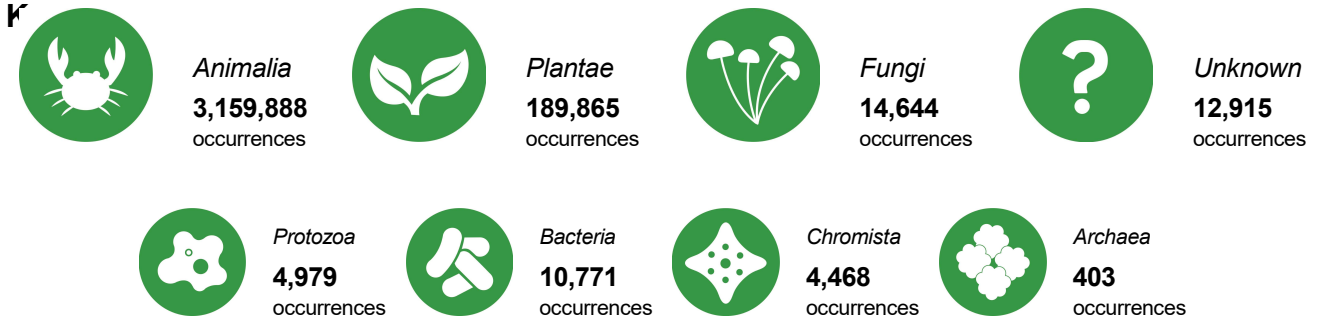

Kenya

This report provides a series of summary charts, statistics and other details about the mobilization and use of open-access species data through the GBIF network, relating to users and participating institutions in Kenya. These metrics show status at the time of report generation, unless otherwise noted. Taken together, the elements of this report can help guide and measure progress toward the information needs for biodiversity research, as well as for national commitments on biodiversity and sustainable development.

Recent peer-reviewed articles using GBIF-mediated data by co-authors based in Kenya

The GBIF Secretariat maintains and reports on an ongoing literature tracking programme, giving priority to substantive uses of GBIF-mediated data in peer-reviewed literature while identifying the countries or areas of the authors' institutional affiliations. The citations below represent the five most recent journal articles with at least one co-author from Kenya.

Those interested in assisting the Secretariat in identifying additional peer-reviewed uses of GBIF-mediated data may forward relevant citations to comms@gbif.org.

de Jong, d'Huart, Butynski. (2022) Biogeography and conservation of desert warthog *Phacochoerus aethiopicus* and common warthog *Phacochoerus africanus* (Artiodactyla: Suidae) in the Horn of Africa. *Mammalia*.

<https://doi.org/10.1515/mammalia-2022-0048>

Waititu, Mundia, Sichangi. (2022) Assessing distribution changes of selected native and alien invasive plant species under changing climatic conditions in Nyeri County, Kenya. *PLOS ONE*.

<https://doi.org/10.1371/journal.pone.0275360>

Ngarega, Gikonyo, Wanga *et al.* (2022) Threatened Fabaceae taxa in coastal East Africa: Current and future modelled distributions and conservation priorities. *South African Journal of Botany*.

<https://doi.org/10.1016/j.sajb.2022.08.033>

Kamau, Karichu, Ngarega *et al.* (2022) The potential distributions of African *Azolla* species and their implications for African wetland ecosystems for the future. *Ecology and Evolution*.

<https://doi.org/10.1002/ece3.9210>

Fallas Conejo, Fremout, Hien *et al.* (2022) Food tree species selection for nutrition-sensitive forest landscape restoration in Burkina Faso. *Plants, People, Planet*.

Data availability

Total data available for selected taxonomic groups in Kenya

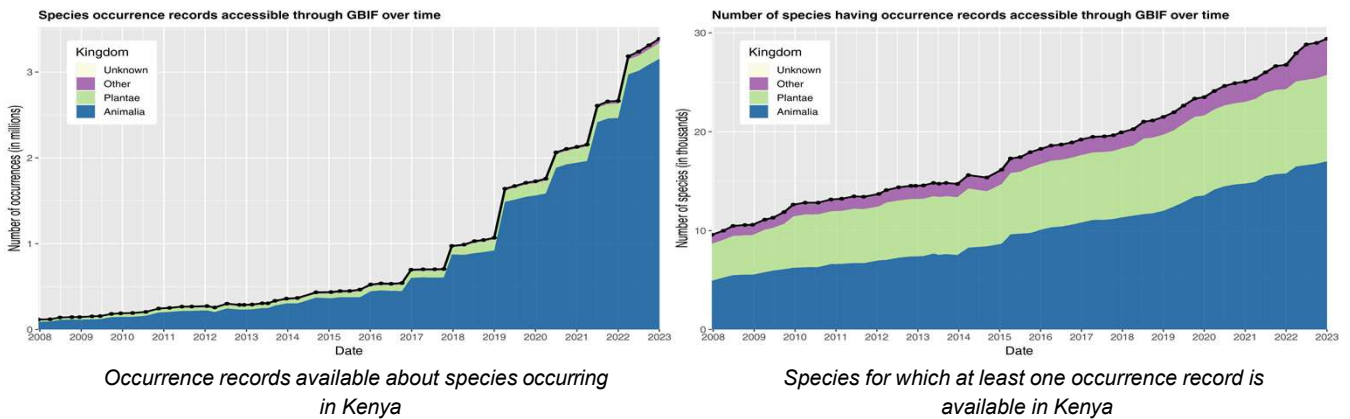

Mammals = Class *Mammalia*
 Birds = Class *Aves*
 Bony fish = Superclass *Osteichthyes* p.p.
 Amphibians = Class *Amphibia*

Insects = Class *Insecta*
 Reptiles = Class *Testudines, Sphenodontia, Squamata & Crocodylia*
 Molluscs = Phylum *Mollusca*

Arachnids = Class *Arachnida*
 Flowering plants = Phylum *Magnoliophyta*
 Gymnosperms = Superclass *Gymnospermae*

Ferns = Phylum *Pteridophyta*
 Mosses = Phylum *Bryophyta*
 Sac fungi = Phylum *Ascomycota*
 Basidiomycota = Phylum *Basidiomycota*

Change over time in records about biodiversity in Kenya

WHY MIGHT THE AMOUNT OF MOBILIZED DATA DECREASE?
 Datasets are sometimes removed by publishers, but more often decreases in the number of records are due to the removal of duplicate records and datasets.

SPECIES COUNTS represent the number of binomial scientific names for which GBIF has received data records, organized as far as possible using synonyms recorded in key databases like the Catalogue of Life

Most recent datasets from publishers in Kenya

Bird Ringing Data of the Taita Hills Forests, 1996 to 2016. *Published by National Museums of Kenya*
<https://doi.org/10.15468/96cup5>

Timed species count birds' data of the Kenyan Coastal Forests, 1992 - 1994. *Published by National Museums of Kenya*
<https://doi.org/10.15468/yg9qje>

Occurrence records of different mammal species from several localities in Kenya. *Published by National Museums of Kenya*
<https://doi.org/10.15468/vyf55f>

Occurrence of Butterflies at Eastern and Central Uganda, 1932-2021. *Published by A Rocha Kenya*
<https://doi.org/10.15468/kw6dms>

Avifauna recorded using point count method during 2003 Spotted Ground-thrush surveys in Kenyan Coastal Forests Fragments. *Published by National Museums of Kenya*
<https://doi.org/10.15468/ca82mz>

Avifauna recorded using Mist netting method during 2003 Spotted Ground-thrush surveys in Kenyan Coastal Forests. *Published by National Museums of Kenya*
<https://doi.org/10.15468/ntbenc>

Number of occurrence records downloaded via GBIF.org published by institutions in Kenya

Data mobilization

Data sharing with country or area of origin by national institutions in Kenya

Data sharing with country or area of origin

The chart above shows the number of records shared over time by publishers within Kenya, with separate colours for records about species occurring within undefined and those occurring elsewhere.

Top data contributors about biodiversity in Kenya

Rank	Country or area	No. of occurrences
1	Kenya	2,008,007
2	South Africa	720,042
3	United States of America	280,180
4	United Kingdom	74,553
5	Netherlands	64,022
6	Belgium	33,597
7	Germany	29,698
8	Norway	14,223
9	Estonia	13,851
10	France	13,490

Table 1. Ranking of countries or areas contributing data about Kenya

Top datasets contributing data about Kenya

EOD – eBird Observation Dataset. *1,651,265 occurrences in Kenya.* (Last updated 2 Mar 2022)

Kenya Bird Map (Full protocol and Adhoc records). *691,941 occurrences in Kenya.* (Last updated 20 Oct 2022)

Kenya Bird Map Occurrence Data. *89,632 occurrences in Kenya.* (Last updated 13 Mar 2019)

iNaturalist Research-grade Observations. *60,011 occurrences in Kenya.* (Last updated 1 Jan 2023)

International Barcode of Life project (iBOL). *48,936 occurrences in Kenya.* (Last updated 5 Feb 2022)

[See all contributing countries and areas or datasets: gbif.org/country/KE/about](https://gbif.org/country/KE/about)

Kenya participates in the following projects coordinated by GBIF

Enhancing capacity of GBIF South Sudan

Capacity Enhancement Support Programme, 2021–2022

<https://www.gbif.org/project/CESP2021-009>

GBIF Africa Nodes data mobilization, ecological niche modelling and data paper training and mentorship

Capacity Enhancement Support Programme, 2015–2016

This project is centred on providing practical training on ecological niche modelling and the preparation of data papers to participants from up to 10 nodes in Africa using real datasets for threatened or invasive species to be published to the GBIF network.

<https://www.gbif.org/project/82204>

Raising the profile of data for the conservation of four forested African landscapes

BID: Biodiversity Information for Development, 2021–2023

<https://www.gbif.org/project/BID-AF2020-140-REG>

Capacity development for mobilization and use of biodiversity data on endangered bird species in Kenya

BID: Biodiversity Information for Development, 2021–2023

<https://www.gbif.org/project/BID-AF2020-014-NAC>

Prioritizing conservation management in an East African forest landscape

BID: Biodiversity Information for Development, 2017–2019

A Rocha Kenya, the National Museum of Kenya (NMK), Kenya Wildlife Service (KWS), Animal Demography Unit of University of Cape Town (ADU), and the Arabuko-Sokoke Forest Guides Association (ASFGA) will access, assess, digitize, engage and improve the data for birds, mammals, invertebrates, reptiles and higher plants in order to inform the management of important, unique and threatened forest ecosystem.

<https://www.gbif.org/project/7EOzw96rgAoSKKUgYaoaCe>

Mobilizing data on freshwater snails in Kenya

BID: Biodiversity Information for Development, 2016–2017

This project is mining and will publish records of freshwater snails from existing voucher collections of the National Museums of Kenya and other research institutions.

<https://www.gbif.org/project/82725>

Mobilizing biodiversity information from the Kenya Wildlife Service

BID: Biodiversity Information for Development, 2016–2018

This project organizes biodiversity data collected in Kenya's protected areas since the 1950's.

<https://www.gbif.org/project/82706>

Kenya's other carnivores: harnessing biodiversity data for conservation

BID: Biodiversity Information for Development, 2016–2017

This project mobilizes existing biodiversity data for 31 species of Kenya's small carnivores to develop a national strategy for their conservation.
