SCHEUER C. 2000. Alphabetical index to Dr. Franz Petrak's exsiccata series *Cirsiotheca universa*. - Graz, Austria: Institut für Botanik der Karl-Franzens-Universität. 4 pp.

Dr. Franz PETRAK (1886 - 1973) was one of the most productive taxonomists of his time. Biographic data and/or bibliographic accounts can be found in various works (e.g., Rechinger 1974, Samuels 1981, Stafleu & Cowan 1983: 205-208). His opus comprises nearly 500 publications, mainly in the field of mycology. In addition, he has edited eight series of exsiccata completely on his own, two of them containing vascular plants, viz. *Cirsiotheca universa* and *Menthotheca universa*. It is somewhat uncertain whether *Cirsiotheca universa* was continued after no. 200 (Stafleu & Cowan 1983: 205).
