

Diversity Workbench

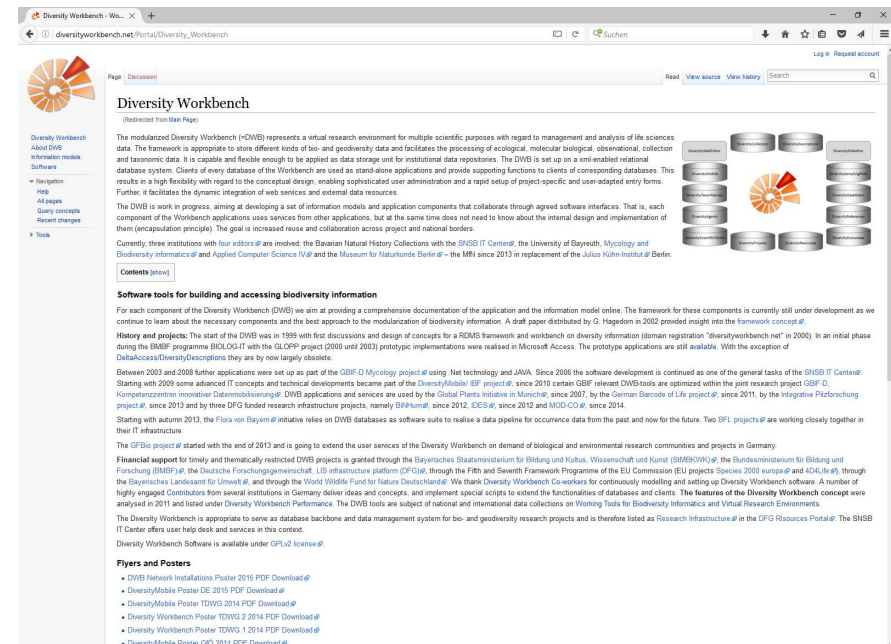

Einführung

Dagmar Triebel

DWB – Philosophie des Teams

- DWB ist definiert als Langzeit-Software Projekt (seit mehr 20 Jahren; 1999)
- Software ist frei verfügbar unter **www.diversityworkbench.net**
- **Open-Source-Implementierung** mit mehr als 1,9 Mio Code-Zeilen
- Software Design, Datenmodelle und ER-Schemata als **Open Access** publiziert
- „User-driven development“ (UDD) mit Software Tests durch derzeit mehr als 30 engagierte Anwender

DWB – Datenmanagement

- Fokus: Erzeugung und Prozessierung von FAIR data in Forschung und Sammlung
- DWB stellt eigene Dienste und Inhalte zur Verfügung (cloud services)
 - Terminologien
 - Vokabularien
 - Taxonomien
 - Gazetteers
- DWB wurde entwickelt für Anwender aus den Lebens- und Geowissenschaften (**Diversitätsdaten**)
- entwickelt für Datenerzeuger, die professionelle Datenkuration anstreben
- entwickelt für Datenerzeuger, die möglichst lange eine umfassende Datensouveränität behalten wollen

Technical documentation for the core applications and rich clients

Name of the database framework	Diversity Workbench (DWB)
DWB contact persons	T. Weibulat, D. Triebel at the SNSB IT Center ↗
Operating system server	MS Windows Server 2008 R2, 2012 R2
Database system	MS SQL-Server 2008 R2 to MS SQL-Server 2014 ↗
Clients	C# desktop applications (local clients) (and web APIs for various projects)
Operating system local clients	MS Windows XP (not recommended), MS Windows 7 to MS Windows 10
GIS functionalities	GIS-Editor , management of geometry and geography data
GUIs for data import	Import-Wizards, txt, CSV, xml in various schemes, xml/xslt, shapes in ESRI-Format
GUIs for data export/ reports	Export-Wizards, txt, CSV, xml in various schemes, xml/xslt, shapes in ESRI-Format
GUI language	default: english (multilingual through translation tables)
Open access	DWB software download
Open source	DWB SVN code repository ↗ , DiversityMobile GitHub repository ↗
Licenses	GPL v.2
Information models online	DWB data models
State of development	since 1999, ongoing
Code language, developer platform	C#, .Net Framework 3.5
User manuals	under DWB user manuals and with the download of the respective applications in the DWB Wiki
Training	DWB workshops ↗ for users and database administrators since 2007

Diversity Workbench – Schnittstellen zum Datenmanagement

The screenshot displays the Diversity Workbench software interface, which is used for managing biological specimen data and taxonomic information. The interface is divided into several main windows:

- DiversityCollection v. 3.0.3.6:** Shows specimen data for *Ceratotherium simum* (Burchell, 1817). It includes a table of displayed fields (e.g., Collection event, Date, Location) and a table of specimen records with columns for Accession number, Collection year, Country, and Locality.
- DiversityScientificTerms v. 3.0.0.0:** A hierarchical tree view of scientific terms, currently showing the 'Indusium' term. It includes fields for Term, Description, Broader term, Ranking term, Hierarchy, External ID, Notes, and Language.
- DiversityAgents v. 3.0.0.3:** A window for managing agents, showing details for 'Hertel, Hannes, Prof. Dr.' including title, given name, and affiliation.
- DiversityTaxonNames, Database: DiversityTaxonNames_Fungi v. 3.0.1.5:** A detailed taxonomic record for *Biatora sylvana* Korb. It includes taxonomic name, nomenclature, taxonomic reference, hierarchy, and a list of synonyms.

The interface is designed for efficient data management and research in biodiversity, providing a comprehensive view of specimen collections and their taxonomic classification.

DWB – in Zahlen

- DWB Software Entwickler an den SNSB: **4**
- DWB Datenbanken auf SNSB Servern: **120**
- Aktive DWB Anwender, verwaltet in DWB Instanzen an den SNSB: **200**
- DWB Anwender geschätzt: mehr als **350**
- SNSB hostet Daten von rund **30** Organisationen, Arbeitsgruppen und Verbundprojekten aus der Forschung, verschiedene Hostingkonzepte, z. T. im Verbund mit **GFBio**
- eigenständige DWB Instanzen administrieren z.B. die SMNK, SMNS, SNSB, ZFMK

NATURKUNDE
MUSEUM
STUTT GART

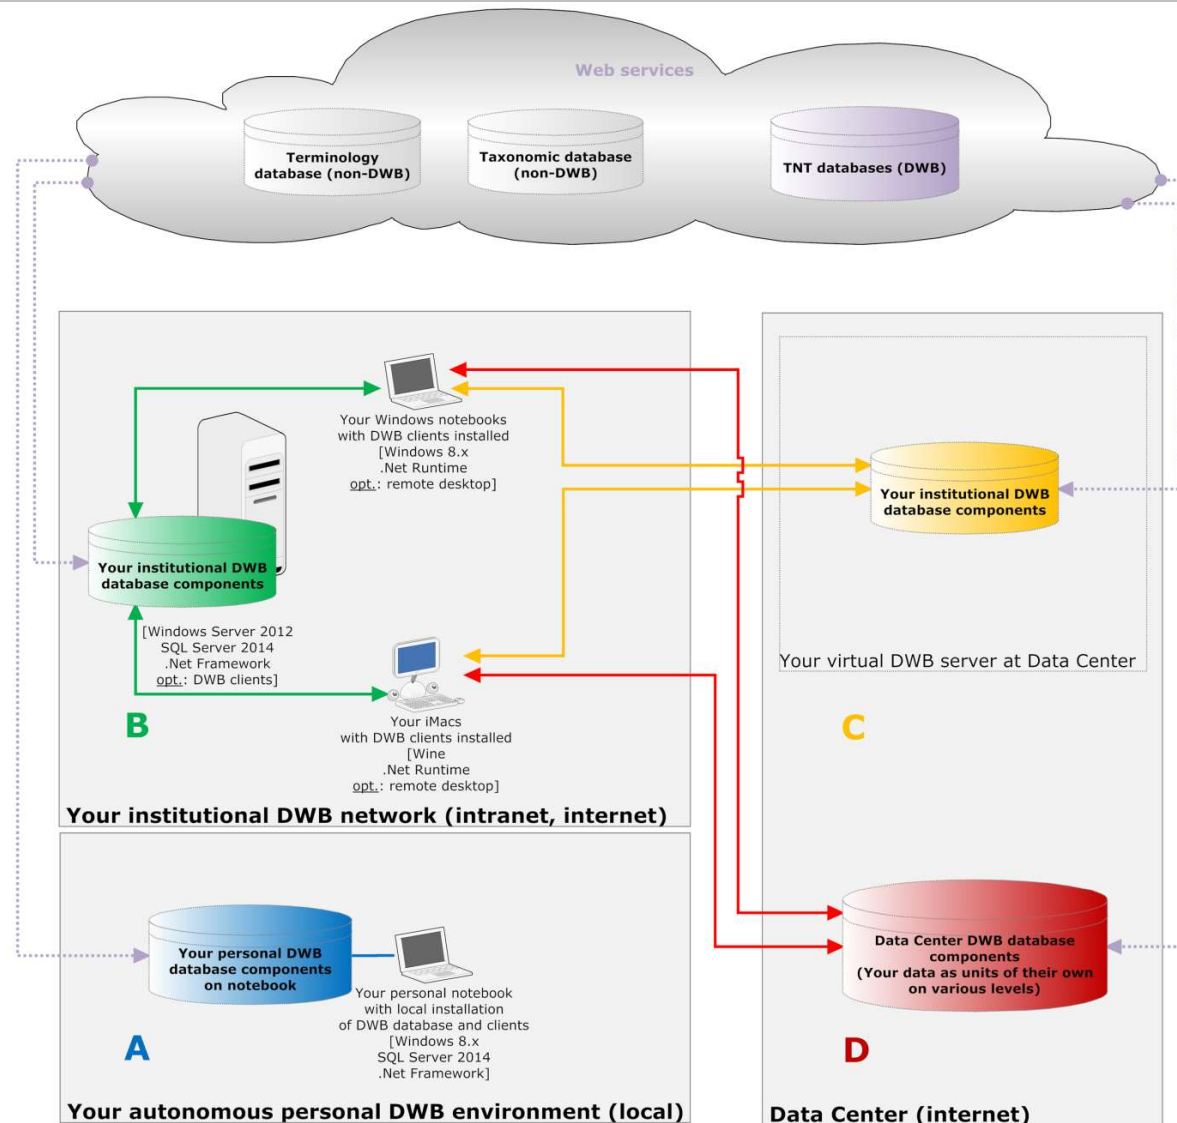

DWB – in Zahlen

- DWB Daten im **GFBio** Netzwerk: > **13.3 Mio** FAIR Daten
- DWB Daten im GBIF Netzwerk: > **14,9 Mio** FAIR Daten
- DWB Daten im Flora von Bayern-Netzwerk: > **15 Mio** FAIR Daten
- Seit 2007: mehr als **450** Teilnehmer an DWB Workshops in München (+ weitere Workshops in SMNK, SMNS und ZFMK)
- DWB Datenkuratoren an SNSB IT Center: dringend benötigt, User Help Desk: Kooperation **GFBio e.V.**

DWB – alternative Installationen und Hosting

DWB cloud services

DWB cloud services

The DWB cloud services at the SNSB IT Center are established for the DWB community. The services offer read-only access to DWB taxon names, terminologies, standard GIS information and concept lists with definitions and hierarchies "TNT" for DWB users, e.g., persons belonging to the institutions and consortia listed [here](#).

Most of the content is ready for download under cc by or cc by sa license?

MS SQL server installation "TNT" with DWB terminologies, DWB taxonomies, gazetteers, sampling plots with shape files and MOD-CO standard concept collections and DD use cases

taxonomies see http://www.diversitymobile.net/wiki/DTN_Taxon_Lists_Services

How to use the DWB REST Webservice for Taxon Lists

The DTN Rest Webservice is set up for machine2machine communication to provide open and free access to taxon list information organised in a DWB cloud installation (TNT) of DiversityTaxonNames (DTN), see overview on [content](#). It is normally used by machines via client programs but from time to time it can also be useful to create requests manually.

Contents [hide]

- 1 Usage Examples
- 2 Query all available lists
- 3 Query all taxon name IDs of a list
- 4 Which analysis are available for this list?
- 5 What is this analysis about?
- 6 Query an analysis value for a taxon name ID
- 7 What means the "E" in the above example?
- 8 Query a list to get all taxon name IDs from a list which have an entry for an analysis ID

Usage Examples

The main starting point for the service is the taxonomic list as all taxon names belonging to a list. A list is also known as a project. The REST service delivers mainly cached results to improve the respond times with a cache duration up to two weeks. If one needs more recent results please ask the administrators.

Regionalised and Domain-specific Taxon Lists

The DWB REST Webservice for Taxon Lists is part of a Diversity Workbench (DWB) services network. It is delivering basic information on taxon names in use, synonyms, classification and German vernacular names of a number of groups of animals, fungi and plants.

The current focus is on domain-specific lists (checklists, taxon reference lists, red lists) from Germany under active curation by experts on taxonomy or floristics and faunistics. Each regionalised and domain-specific taxon list has its own history and objectives, is managed completely separately and has its own hierarchical classification. The DiversityTaxonNames (DTN) data resources accessed by the REST API may include additional taxon-related data useful, e.g., for regional nature conservation agencies and environmental projects. This information might be mobilised in a next step.

Description: The Bavarian Natural History Collections (Staatliche Naturwissenschaftliche Sammlungen Bayerns, SNSB) are a public consortium of scientific research institutions, natural history museums and a botanical garden. They are a sub-item of the Bavarian State Ministry of Sciences, Research and the Arts. All these institutions are located in Bavaria and have a wide range of tasks and goals. The data provided by the SNSB are processed by the SNSB IT Center (www.snsb.info). The data ownership is as cited under the single data resources.
